Professional Summary

Self-motivated and dedicated Final Year BS Software Engineering student at FAST-NUCES with a solid foundation in software design, development, and data-driven systems. Experienced in building AI-powered solutions, full-stack applications, and process automation using modern tools. Passionate about developing scalable, efficient, and intelligent software that bridges innovation across AI, automation, and web technologies.

Education

FAST - National University of Computer and Emerging Sciences	Islamabad, Pakistan
Bachelor of Engineering in Software Engineering, CGPA: 3.12 (7th semester)	Aug. 2022 – Present

Experience

Web Developer Intern	Jun. 2025 – Aug. 2025
Nexium (AI-Powered Software & Consulting)	Remote
- Developed and deployed an AI-powered website using Next.js with seamless backend integration. - Worked with PostgreSQL and MongoDB databases to design efficient and scalable data management solutions. - Integrated workflow automation using n8n for backend processes and API orchestration. - Implemented reusable UI components with ShadCN and Tailwind CSS to improve design consistency. - Deployed production-ready builds to Vercel ensuring fast performance and uptime.	

Projects

Build-iT (Construction Bidding Website) <i>HTML, CSS, JavaScript, MySQL, Flask</i>	Mar. 2025 – Jun. 2025
Developed a web platform for construction project bidding, enabling users to post projects and builders to place bids.	
Flexi (University Student Portal) <i>Django, Python, MySQL, HTML, CSS</i>	Sep. 2024 – Dec. 2024
Created a university management portal for tracking attendance, grades, and academic data.	
Day Planner (Personal Timetable) <i>Java, MySQL, Android Studio</i>	Mar. 2024 – Jun. 2024
Designed a mobile app for managing daily tasks, appointments, and productivity schedules.	
Custom PC Builder <i>Java, GUI, IntelliJ IDEA, MySQL</i>	Feb. 2024 – May. 2024
Built an application for selecting PC components, checking compatibility, and viewing estimated pricing.	
Hospital Management System <i>C++, OOP, Ubuntu, VS Code</i>	May. 2023
Developed a management system for hospital records and operations using OOP principles.	

Technical Skills

Programming Languages: C/C++, C#, Python, Java, JavaScript, TypeScript, PHP, HTML/CSS, Bootstrap
Frameworks & Libraries: Next.js, React, Django, Flask, ShadCN, Tailwind CSS
Databases: PostgreSQL, MongoDB, MySQL
Tools & Platforms: n8n, Vercel, Google Colab, VS Code, IntelliJ IDEA, Ubuntu, Android Studio
Soft Skills: Leadership, Communication, Teamwork, Time Management, Creativity, Quick Learning, Attention to Detail

Achievements

Best Presentation Award — Web Security project in ICT course (Oct 2022).
Distinction in Sports — Recognized for achievements at high school and college level (2017–2020).

Co-Curricular Activities

Head Boy and Senior Prefect (2018–2020) — Demonstrated leadership and management capabilities at high school.

Management Head — FAST Problem Solving Challenge (FPSC), organized programming competitions to strengthen student coding skills.
