

Sage Project – Gherkin Test Cases

Successful Candidate Registration

Given the candidate is on the registration page, **when** they enter a valid email "candidate@example.com" and password and click the "Sign Up" button, **then** a "Registration Successful" message should appear and a new user record should be created in the database.

Profile Completion with Personal Details

Given the candidate is logged in, **when** they update their bio to "Experienced Computer Science Professor" and save their profile, **then** the profile should display the updated bio.

Adding a New Skill to Profile

Given the candidate is on their profile page, **when** they add the skill "Python" with "Expert" proficiency, **then** "Python" should appear in their list of skills.

Uploading a CV for Parsing

Given the candidate is on the "Upload Resume" page, **when** they upload the file "resume.pdf", **then** the system should extract the "Education" and "Experience" sections and display the parsed data for review.

Extracting Education from CV

Given a CV contains the text "PhD in Computer Science from FAST-NUCES", **when** the parser processes the CV, **then** it should identify "PhD" as the degree and "FAST-NUCES" as the university.

Searching for Jobs by Title

Given several job listings exist in the system, **when** the candidate searches for "Lecturer", **then** only jobs with "Lecturer" in the title should be displayed.

Saving a Job for Later

Given the candidate is viewing a job listing titled "Senior Professor", **when** they click the "Save Job" button, **then** the job should appear in their "Saved Jobs" list.

Job Recommendation Based on Skills

Given the candidate has "Machine Learning" listed in their skills and a job titled "AI Researcher" requires "Machine Learning", **when** the candidate views recommendations, **then** the "AI Researcher" job should appear among the top recommendations.

Applying to a Job Listing

Given the candidate is viewing a job listing for "Assistant Professor", **when** they click the "Apply" button, **then** the application status should be set to "Applied" and the application should appear in the "My Applications" dashboard.

Starting an Online Test

Given the candidate has applied for a job that requires a test and is on the "Test Dashboard", **when** they click "Start Test", **then** the test timer should begin and the first question should be displayed.

Adaptive Difficulty Adjustment

Given the candidate is taking a test, **when** they answer the question, **then** the next question should be of harder difficulty.

Completing the Test and Viewing Score

Given the candidate is on the last question of the test, **when** they submit the final answer, **then** the system should calculate the test score and update the application status.

Submitting an Interview Recording

Given the candidate has completed an AI-led interview, **when** they submit the recording, **then** the interview recording URL should be stored in the application record.

AI Scoring of Soft Skills

Given an interview recording has been submitted, **when** the AI analyzer processes the recording, **then** it should generate scores for communication and problem solving.

HR Viewing New Applications

Given several candidates have applied for the a position, **when** the HR manager views the job applications, **then** they should see a list of all applicants.

Inviting a Candidate for an Interview

Given a candidate has passed the online test, **when** the HR manager updates the application status to "Interview", **then** the candidate should receive an interview notification.

Receiving a Notification for Status Change

Given the HR manager rejects an application, **when** the application status is updated to "Rejected", **then** a notification should be sent to the candidate's email.

Viewing Application Timeline

Given a candidate's application has moved from "Applied" to "Test" to "Interview", **when** the HR manager views the application timeline, **then** all status changes should appear in chronological order.
