

Final Year Project

Sage

Your Hiring Partner

INTRODUCTION

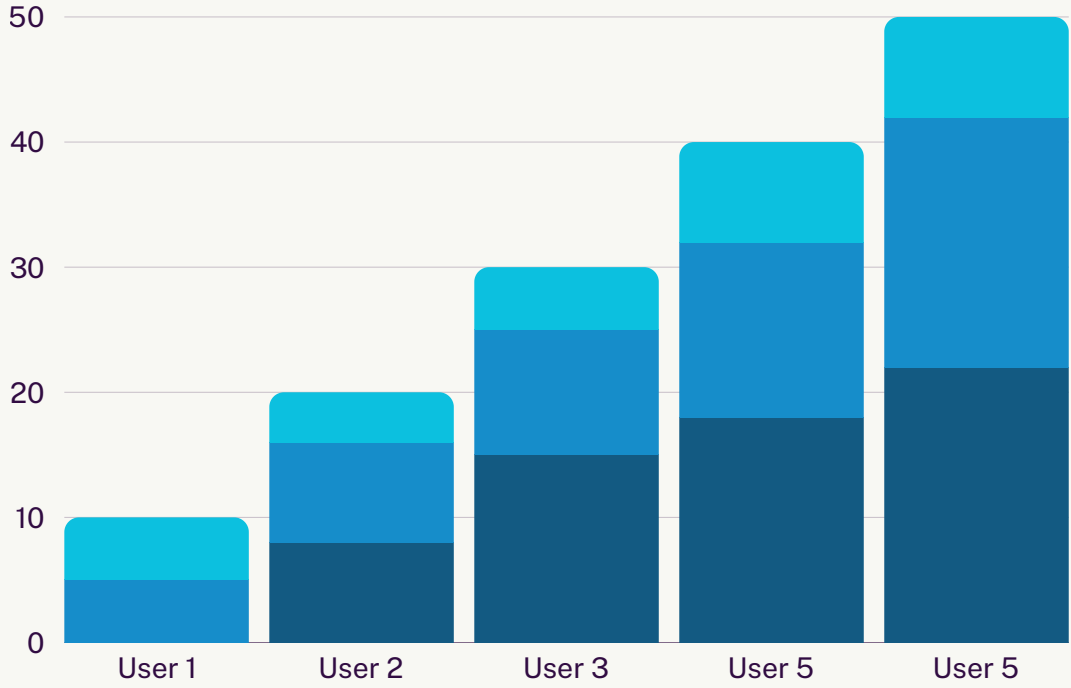

Sage is an AI-powered recruitment system that automates resume screening, tests, and video interviews. Its smart matchmaking engine recommends the best-fit candidates for each role, making hiring faster, fairer, and more efficient.

OBJECTIVE	METHODOLOGY	RESULTS
• Simplify and speed up the hiring process. • Reduce human bias in candidate evaluation. • Match candidates to the most suitable roles. • Provide a transparent and centralized platform for HR.	Candidates first register on the platform and then upload their resume. AI extracts key details, generates personalized tests, and conducts AI-assisted video interviews to assess technical and soft skills.	Results show the outcome of the research and should answer the question or hypothesis stated in the introduction. State what you've found from your study.

TECHNOLOGIES

User	Score 1 (Dark Blue)	Score 2 (Medium Blue)	Score 3 (Light Blue)	Total Score
User 1	5	5	5	15
User 2	8	8	4	20
User 3	15	10	5	30
User 5	18	14	8	40
User 5	22	20	8	50

Graphs visualize candidate performance and match scores, clearly showing which candidate best fits each role.

CONCLUSION

To wrap up your poster, present two to three key findings. You can also add a brief explanation or narrative to these that can encourage conversation or dialogue with the audience. These findings can be actionable items that can lead to implementation, policy creation, or further study.
